BRADFORD.

LIST OF HYBRIDS.

IN issuing our 1895 Catalogue, we have thought it would be useful to our customers and friends to have a List of Hybrids raised up to date for reference. We have given these lists at the end of price list of each species. For easy reference Cypripediums and Selenipediums are given separately. Cattleyas, Lælias, Lælio-Cattleyas and Sophro-Cattleyas will be found together; Sophro-Cattleyas are also given after Sophronites.

In Cypripediums we have omitted the sub-varieties. There are many Seedlings from the same parents with different names, owing to their having been raised abroad, etc.; but we have only included such varieties as are better than the original cross, and those which have been acknowledged by Horticultural authorities and Press. We shall be pleased to give any further particulars with regard to raiser's name, when shown or described, etc.

TERMS OF SALE.

UNKNOWN correspondents are respectfully requested to send a remittance or satisfactory reference with their orders.

All orders are carefully packed at cost price and forwarded free of charge to the Railway Stations at Owner's risk, saving thereby a considerable expense of Carriage. Half-price will be allowed for returned empties; the sender should always attach his name to the package, and advise us by post.

We beg to draw special attention of our customers and intending buyers that the prices quoted are for VIGOROUS, HEALTHY, and CLEAN PLANTS, which will flower in reasonable time from date of purchase. The prices given herein are those current at the date of going to press; owing to the very frequent importations of Orchids, the value of many kinds varies considerably, and we shall be happy to quote the latest price on application. Special prices for newly imported plants, large quantities, or specimen plants sent at any time by return of post. We shall be at all times pleased to see visitors at our Nurseries, and show them anything worth notice. Our Orchid houses are well appointed and stocked with many interesting plants.

Tram Cars, starting from Darley Street, Bradford, run every five minutes to Victor Road, Manningham; the distance from the terminus to the Heaton Nursery, Wilmer Road, is about six minutes.

French and German Correspondence.

A SELECT LIST

— OF —

New, Rare, & Beautiful Orchids,

Grown for Sale by

CHARLESWORTH & Co.

AERIDES SCHRODERÆ.

Beautiful and very rare, flowers very delicate white, tinged with lilac and deliciously scented.

Price £5 5s. each.

BILBERGIA SANGUINEA.

Very showy, dwarf habit, bracts intense red, flowers blue. Awarded a First Class Certificate, Royal Horticultural Society, May 9th, 1893.

Price 10s. 6d. each.

CATTLEYA AUREA.

It is a well-known fact that the finest forms and hybrids, flowered in various collections, have been imported by us. Amongst the most noteworthy, we may mention *C. aurea marmorata*, *C. Hardyana* (Wilson's variety), *C. Massaiana*, and recently the beautiful and much admired *Countess of Derby*.

All these plants were collected from a very remote district, and we have spared neither trouble nor expense in importing the wonderful strain of this lovely Cattleya.

Price of good plants, 15s. to 21s. each.

CATTLEYA GIGAS SHUTTLEWORTHII.

A superb form of the type (*Cattleya gigas*) ; petals and sepals, $8\frac{1}{2}$ inches ; depth of labellum, 4 inches ; breadth, $3\frac{3}{4}$ inches ; length of tube, $1\frac{1}{2}$ inch.

Of a deep rich purple-lake, eight gold veins down the throat, beautifully fringed and margined. The finest of all the *gigas*.

Price on application.

CATTLEYA HARDYANA.

A most gorgeous *Cattleya*, doubtless a hybrid between *C. gigas* × *C. aurea* ; the growth resembles that of *C. gigas* ; the individual flowers measure 8 and 9 inches across ; the sepals and petals are of a deep rosy purple ; the lip measures 3 inches, its anterior portion being much frilled, and is of a pure magenta-crimson. The throat and upper portion of the lip is veined with rich golden yellow, margined with the magenta, as in the anterior portion of the lip ; the flowers are strongly scented. It blooms in August.

Size and Price on application.

CATTLEYA INTERMEDIA ALBA.

A pure white form of this well-known *Cattleya*, and which we believe is quite unique.

Price on application.

CATTLEYA LABIATA "DELICATA."

A self-coloured *Cattleya*, very pleasing in appearance ; sepals and petals faintly blush, lip of same colour with a purple blotch in the centre. The flowers open pure white, and turn slightly coloured three days after being open.

Price £2 12s. 6d. each.

CATTLEYA LABIATA ELEGANS.

One of the most distinct and handsome varieties of the *Cattleya labiata* section. The flowers are seven inches in diameter ; sepals and petals are pure white, broad and well-shaped ; lip white, beautifully fringed, with a small blotch of bright purple on the front portion, and a few crimson-purple lines in the throat.

Price on application.

CATTLEYA LABIATA "EXCELSIOR."

A very bold handsome form ; petals and sepals broad, well-coloured, and slightly fringed ; lip of great beauty and size, measuring $2\frac{3}{4}$ inches in diameter, and is well fringed, with a margin of pure white colour ; the flower is exceptionally well shaped and symmetric. The plant produced on several occasions four flowers on the spike.

Price £5 5s. each.

CATTLEYA LABIATA "JEANETTE."

This is perhaps one of the prettiest *Cattleya labiata* seen. Flowers of medium size, beautifully shaped ; sepals and petals dark purple. The great feature of this *Cattleya* is the labellum, which is dark velvety purple, and with a crest of white, without the least trace of yellow or orange in the throat, replaced by two blotches of dark purple like in *Cattleya gigas*.

Price £3 3s. each.

CATTLEYA MASSAIANA.

A handsome *Cattleya* ; a natural hybrid between *C. aurea* × *C. gigas*, which two species are found growing together in the same district in Antioquia, U.S. Colombia. The sepals and petals are in form like those of *C. aurea*, bright rose-coloured, mottled with white, and softening off into white towards the base ; the lip is large, the margin beautifully frilled, rich magenta-erimson.

The throat is striped with rich brownish erimson, on a bright yellow ground, having two large areas of bright yellow. Flowers sweetly scented.

Size and Price on application.

CATTLEYA MOSSIÆ HARDYANA.

The most remarkable form of *C. Mossiæ* yet flowered. The flowers are large, having very irregular markings ; sepals and petals pale blush-rose, irregularly blotched and veined with magenta-purple ; the lip is beautifully frilled, the front portion striatly marked with rich magenta-purple ; throat orange-yellow.

Size and Price on application.

CATTLEYA SCHRODERÆ ALBA.

A white form of this beautiful and sweetly-scented *Cattleya*, with a yellow blotch in the throat.

Price on application.

CATTLEYA TRIANÆ ALBA.

A chaste and charming variety, having pure white flowers, except a stain of yellow in the throat.

Strong healthy plants, £10 10s. each.

CATTLEYA WAGENERI.

A truly handsome free-flowering Cattleya; a white form of *C. Mossie*, with flowers equal in size. The sepals and petals are pure white; the lip is also white, with a bright yellow-orange throat. The plant is of free habit and easy cultivation.

Size and Price on application.

CYMBIDIUM EBURNEO-LOWIANUM.

This distinct and pretty hybrid is the result of a cross between *C. eburneum* and *C. Lowianum*, the habit of which is nearer that of *C. eburneum*, than that of *C. Lowianum*. Pseudo-bulbs ovoid, compressed, $2\frac{1}{2}$ to 3 inches long; three to four equitant leaves on each side, gradually longer upwards, and an apical one; all broader than in *C. eburneum*, but narrower than in *C. Lowianum*, and with the characteristic pale basal band of the last-named species.

The racemes are longer than those of *C. eburneum*, and bear from five to eight flowers.

The flowers are equal in form to the best *C. eburneum*, and delightfully fragrant; the sepals and petals are similar and sub-equal, almost ivory-white, oblong-lanceolate; the petals and lateral sepals spreading, the dorsal sepals bent forward; lip nearly as in *C. Lowianum*, ivory-white on the inner side, with a V-shaped red-erimson blotch on the reflexed front lobe, lamellæ of the disk bright yellow; column ivory-white, with a reddish crimson stain next to the anther case. Received a First Class Certificate, R.H.S.

Size and Price on application.

CYMBIDIUM LOWIANUM CONCOLOR.

A distinct variety of the grand *C. Lowianum*, distinguished from the type by the flowers, which are of a clear light buff-yellow, all traces of the red-erimson blotch in the apex of the lip being absent, which gives the variety a charming appearance.

Price on application.

CYPRIPEDIUM "CHAS. RICHMAN."

This fine hybrid is the result of crossing *C. barbatum superbum* and *C. bellatulum*, and is up to the present date one of the finest and best-coloured hybrids obtained from *C. bellatulum*. The dorsal sepal is whitish, veined and striped with deep rosy purple; the petals are of a similar colour, heavily marked with dark purple spots. The flower has an elegant appearance and a pleasing colour.

Price £10 10s. each.

CYPRIPEDIUM CHARLESWORTHII MAGNIFICUM.

An exceedingly well-coloured and handsome form of this beautiful *Cypripedium*; this is one of the best we have flowered out of a large number of plants; dorsal sepal very dark, well formed, and of gigantic size; sepals greenish brown, proportionate in size. A very striking bold flower.

Price of strong plants with two growths, £2 12s. 6d. each.

CYPRIPEDIUM FAIRIEANUM.

We are pleased to be able to offer a small plant of this extremely rare and handsome plant.

Price on application.

CYPRIPEDIUM LEEANUM GIGANTEUM.

This giant form is the result of crossing *C. Spicerianum* with a very large form of *C. insigne*; the dorsal sepal is of a pure white colour, measuring 3 inches in diameter; very large in proportion.

Price £10 10s. each.

CYPRIPEDIUM SCHRODERÆ SPLENDENS (Charlesworth's var.)

A very distinct and beautiful hybrid raised by us from *C. caudatum roseum* and *C. Sedenii*; exhibited and awarded a First Class Certificate at the Manchester Spring Show in 1894. The flowers are of a very bright purple colour, without the least trace of white or green as in the type.

Price £4 4s. each.

CYPRIPEDIUM STATTERIANUM.

This handsome hybrid was raised by us from *C. Spicerianum magnificum* and *C. vexillarium superbum*, "Howick House variety," and received a First Class Certificate when exhibited at the Royal Horticultural Society's Meeting by T. Statter, Esq. The dorsal sepal is very broad and of a deep rosy purple, veined with a dark colour, and a deep purple medium band; base covered with numerous minute purple-brown spots; lip short and stout, purplish brown, staminode deep purple-rose. The plant produces twin flowers, and has been greatly admired whenever exhibited.

Price on application.

CYPRIPEDIUM THAYERIANUM SUPERBUM.

Another fine hybrid raised by us between *C. Lawrenceanum superbum* and *C. Boxallii atratum*. The plant produces twin flowers, and is of a handsome and bold appearance.

Price of strong plants, £4 4s. each.

DENDROBIUM ASPASIA.

This charming hybrid is the result of a cross between *D. aureum* and *D. Wardianum*. In growth it resembles the latter, having strong thick pseudo-bulbs, and is very floriferous. The sepals and petals are creamy white, tipped with light rose-purple, which is most distinct on the petals. The lip has a very large orange disc, on which is an irregularly pencilled crimson blotch; in front of this is a creamy white area, and finally the apex is rose-purple. Altogether this is a handsome plant, and will prove itself worthy of a place in the choicest collection.

Price on application.

DENDROBIUM BURFORDIENSE.

This is a handsome hybrid between *D. Linawianum* and *D. aureum*; it is of good habit, and very free-flowering. The growth is intermediate between the two parents, but there is no indication of any nodes; sepals and petals are bright rosy purple, white towards the base; lip white, tipped with rosy purple, throat deep reddish purple.

Price on application.

DENDROBIUM CŒLOGYNE.

We have great pleasure in being able to offer this long lost and extremely rare species. *The Gardeners' Magazine*, October 27th, 1894, says:—"This is a remarkable Orchid, the growth being like that of many *Bulbophyllums*. The flower is also much like a *Cœlogyne*. The sepals and petals are a deep green, streaked and spotted closely with dark crimson. The lip is large, and of a deep velvety purple colour, trilobate, with margins slightly incurved. The column is adnate to the dorsal sepal, its colour being crimson and purple with a creamy tip. The pseudo-bulbs are corrugated, small and pale green, diphyllous, set about 4 to 6 inches apart, on slender rhizomatous growths." A good illustration is given in the *Gardeners' Magazine*, November 3rd, 1894, page 658.

Price of good plants, £2 2s. each.

DENDROBIUM EURYALUS.

This fine hybrid is a cross between *D. Ainsworthii* and *D. nobile*. In growth it resembles *D. nobile*. The flowers are larger than either of the parents. The sepals and petals are whitish, tinged with purplish crimson. The lip is flat and of a cream-white, having a deep purple eye.

Price £2 2s. each.

DENDROBIUM GUIBERTII.

A superb Dendrobe, in habit much like a robust form of *D. densiflorum*. The racemes of flowers are much longer, and the flowers brighter and larger; flowers nearly 2 inches across, bright yellow. This variety is extremely rare.

Price on application.

DENDROBIUM HILDEBRANDTII (New Species, Rolfe).

This new and distinct species was introduced by us from a remote and uninhabited district in Burmah.

The plants vary considerably in appearance, and doubtless there will be many varieties amongst them. They are quite distinct, resembling slightly *D. nobile*; the bulbs are somewhat flatter in appearance, varying in length from 10 to 36 inches, and show an abundance of old flower spikes. The flowers are sulphur-yellow, a trifle darker towards the centre, 3 to 3½ inches in diameter; lip of same colour, unusually large and open, with an orange blotch in centre. A very handsome and distinct species. Figured in the *Orchid Review*, Vol. III., page 49.

Price 7s. 6d. to £4 4s. each.

DENDROBIUM JUNO.

A fine hybrid, the result of a cross between *D. Findlayanum* and *D. Ainsworthii*. In form it is intermediate between the two parents; pseudo-bulbs shortish and stout. Flowers well shaped, fine and bold, and sweet-scented; sepals and petals white, suffused with rose towards the tips; lip well opened, large and good shaped, white, tipped with rose; throat deep purple.

Price on application.

DENDROBIUM LUNA.

This beautiful hybrid is a cross between *D. Ainsworthii* and *D. Findlayanum*. In growth it resembles the latter, but the bulbs are not quite so distinctly noded. The flowers are very delicate, sepals and petals are yellowish white, faintly tipped with pale rose; lip white with a clear yellow throat, and very sweet-scented.

Price on application.

DENDROBIUM RUBENS.

A fine hybrid, the result of a cross between *D. Leechianum* and *D. nobile nobilius*. The sepals are broad and flat, $3\frac{1}{2}$ inches in diameter, white tinged with a peculiar purple-crimson; petals 4 inches across and 1 inch in width, and heavier colouring than the sepals, of a more purple hue. In growth and freeness of habit the plant resembles *D. splendidissimum grandiflorum*.

Price £3 3s. each.

DENDROBIUM SPLENDIDISSIMUM GRANDIFLORUM.

The very best form of this gorgeous Dendrobium, which is still very scarce in collections.

Price £8 8s. each.

DENDROBIUM SPLENDIDISSIMUM LEEANUM.

From the original plant.

Price £10 10s. each.

DENDROBIUM VELUTINUM (Rolfe).

In describing this plant, Mr. R. A. ROLFE writes:—

A dwarf species, with stout terete pseudo-bulbs, not exceeding $\frac{1}{2}$ foot high, and bearing three or four oblong coriaceous leaves at the summit. The racemes bear two or three deep orange flowers, of unusual substance, nearly 2 inches in diameter when expanded, and the three-lobed is of the same colour and very velvety, in allusion to which it is named. The spur is extremely short, being reduced to a mere protuberance, and the sepals are keeled.

It is very distinct, and there is only one species with which it can well be compared, and that is *D. trigonopus* (Rehb. f.), which is believed not to be in cultivation.

Price 10s. 6d. to 63s. each.

GONGORA CHARLESWORTHII (New Species, Rolfe).

This charming *Gongora* was introduced by us from Peru, and named in honour of our Mr. J. Charlesworth. In habit it is somewhat like *Gongora truncata*. The leaves are broadly lanceolate, plicate, about 10 inches long, and 2 to $2\frac{1}{2}$ inches broad. Scape arching, from 20 to 40 inches long, and bears from forty to eighty flowers. Sepals and petals are rosy pink, barred and spotted with bright purplish red of a peculiar shade; lip and column of a brownish purple shade.

Price 31s. 6d. and 42s. each.

LÆLIA JONGHEANA.

An extremely rare and handsome species, with small oblong pseudo-bulbs; the scape is two-flowered; flowers $4\frac{1}{2}$ —5 inches in diameter, spreading, nearly flat, of a soft rose-purple colour. Figured in the *Botanical Magazine*, tab. 6038. *Gardeners' Chronicle*, 1872, p. 425, fig. 128.

Price on application.

LÆLIA PURPURATA ROSEA.

A most elegant form, sepals and petals of a beautiful rosy pink hue, very large and not reflexing, the large labellum of the same colour, with dark veins radiating from the centre.

Price 52s. 6d. each.

LÆLIA TENEBROSA CHARLESWORTHII.

A distinct variety, flowers of good medium size, sepals and petals of a metallic hue, bronzy black, very shiny and broad; labellum pure white and open, veined with many magenta-purple lines.

Price on application.

LÆLIA TENEBROSA CONSPICUA.

A grand variety, flowers of exceptionally large size, very broad sepals and petals; bronzy brown lip, beautifully frilled, strong plant with sheath.

Price 63s. each.

LÆLIA TENEBROSA DECORA.

Splendid variety of delicate hue, flower medium size, symmetrical; labellum beautifully tinged and marked with violet-purple, strong plant with sheath.

Price 52s. 6d. each.

LÆLIA TENEBROSA MAGNIFICA.

An exceedingly pretty and well coloured form, of good size and substance. Good plant to flower this year.

Price £2 2s. each.

LÆLIA TENEBROSA MARMORATA.

One of the most extraordinary forms yet flowered, sepals and petals large in size; salmon-pink, irregularly spotted and blotched with bronzy brown, very remarkable and handsome.

Price £10 10s. each.

LÆLIO-CATTLEYA EXIMEA.

This magnificent gem is a hybrid between *Cattleya Warneri* and *Laelia purpurata*; the growth is intermediate between the two parents. The sepals and petals are of a most pleasing rosy-purple; the lip somewhat resembles that of *C. Warneri*; bright rosy purple, the exterior portion being much darker; the throat has bright yellow lines.

Price on application.

MILTONIA BLEUEANA.

This handsome hybrid is the result of a cross between *M. vexillaria* and *M. Roezlii*, raised by M. Alfred Bleu, of Paris. The flowers have a more symmetric appearance than the parents, sepals and petals being proportionately larger than in *M. vexillaria*; white in colour, labellum having some purplish brown pencil markings at the base.

Price on application.

MILTONIA BLUNTII LUBBERSIANA.

A very beautiful and distinct variety, with larger flowers than the type; sepals and petals of a light pleasing yellow, covered with heavy irregular blotches and bars of rich chestnut-brown; labellum very large, rosy purple at the base, gradually passing into white.

Price on application.

MILTONIA VEXILLARIA "FAIRY QUEEN."

A lovely variety; flowers pure white, with a faint rosy tinge at the base of the sepals and petals.

Price £5 5s. each.

MILTONIA VEXILLARIA "SUPERBA."

A variety of extreme beauty, although the flowers are only of medium size; the colour is intensely brilliant, compensating for the lack of size; sepals and petals rosy purple; labellum bright magenta-rose, and in the white area at the base is a triangular dark port-wine-coloured blotch, veined with radiating lines of a darker tint.

Price £10 10s. each.

ODONTOGLOSSUM ANDERSONIANUM IMPERIALE.

A very fine and distinct variety, believed to be a natural hybrid. The sepals and petals are pale yellow, heavily blotched and spotted with rich dark red; lip very broad, bearing a large blotch of chestnut-red. This is the finest of all the type.

Price £5 5s. each.

ODONTOGLOSSUM CRISPUM APICULATUM.

A very distinct and beautiful variety; the flowers are bold in form, sepals and petals are round and broad, well-shaped and of great substance, white, having a very large blotch of chestnut-crimson on each sepal; the lip is white, with a large crimson blotch on the lower portion.

Received an Award of Merit, Royal Horticultural Society; and a First Class Certificate at the Manchester Orchid Exhibition.

Price on application.

ODONTOGLOSSUM HENNISII (New Species, Rolfe).

This unique plant was sent home by our collector Mr. Hennis, whose name it bears. It is a natural hybrid between *O. Hallii* and *O. cirrhosum*. A very pretty and interesting plant.

Price on application.

ODONTOGLOSSUM LEPIDUM.

A natural hybrid, short branching, many-flowered, one spike having produced thirty flowers. The flowers open with a yellow ground colour, but retain that colour only for nine or ten days, and afterwards change to a white ground colour with yellow edging; sepals cinnamon-blotched, petals with but one blotch. —Reich. fil., see *Gardeners' Chronicle*, No. 513, Oct. 27th, 1883.

Price on application.

ODONTOGLOSSUM MULUS.

A supposed natural hybrid; an unusually fine form. The ground colour of the flower is bright yellow, very wavy at the margin; the sepals and petals are irregularly blotched and spotted with a bright cinnamon-brown; lip yellow, with a large cinnamon blotch towards the centre, and a few small spots near the crest, making a most handsome flower.

Price £15 15s. each.

ODONTOGLOSSUM RAMOSISSIMUM.

The plants offered by us are an exceedingly fine type, being collected in a new district from that where this species was originally found. We have flowered some grand varieties from this locality. The plant is of easy culture, and most free flowering, having long branched panicles of innumerable flowers; the sepals and petals are narrow, undulate, of a fine white, the basilar portions of the petals lilac-purple; the lip is undulated at the base, the front part being pointed, having a large purple-lilac disc.

Price 15s. to 42s. each.

ODONTOGLOSSUM RUCKERIANUM SUPERBUM.

This is certainly one of the finest forms of this section of hybrids that we have flowered amongst the enormous number which have been imported and bloomed in our establishment. The flowers are much larger, sepals and petals being broader than the type. The sepals and petals are bright yellow, with a broad margin of deep rosy violet, heavily spotted and blotched with bright chocolate-crimson; lip bright yellow, with large blotches in the centre, and several spots of bright chocolate-crimson; the petals have the chocolate-crimson lines at the base.

Price £10 10s. each.

ODONTOGLOSSUM WILCKEANUM NOBILIOR.

An extraordinary well-coloured form, flowers of remarkable size. Exhibited at the Temple Show, May 25th, 1893.

Price on application.

ONCIDIUM CARDIOCHILUM.

This is a very showy species, carrying long branching spikes of beautiful coloured flowers; sepals and petals bronzy brown, tipped with creamy white; labellum bilobed, golden yellow speckled at the apex, with bright chestnut bars and spots.

Price £2 2s. each.

PLEUROTHALLIS ROEZLII.

A remarkably striking Orchid, producing seapes of dark purple flowers; this plant is exceedingly rare.

Price £3 3s. each.

VANDA CHARLESWORTHII (New Species, Rolfe).

A natural hybrid between *V. cœrulea* and *V. Bensoniæ*, exactly intermediate between the two parents. The flowers are $2\frac{1}{2}$ inches in diameter, sepals and petals being almost like in *V. cœrulea*, but beautifully veined and suffused at the margin with light rosy purple, instead of blue; the labellum has almost the texture of *V. Bensoniæ*, while the shape is about intermediate between the two parents. First Class Certificate at the Manchester Whitsuntide Show, 1894.

Fully described in the *Orchid Review*, vol. ii., page 322.

Price on application,

TENEBROSA.	The true large and dark coloured variety, not the one hitherto sold as such; sepals and petals dark bronze; lip purple, veined with rose; the flowers are as large as those of <i>Lælia purpurata</i> . The plants which have flowered in England have shown it to vary greatly, both in size and colour; a decided novelty of the first quality,

VEXILLARIA.—These plants are in every respect of a superior type to the old Frontino varieties, a large proportion of dark ones being among them, and some extraordinary fine varieties have been flowered out of this importation; some flowers having dark sepals and petals and a pure white lip, others being very dark coloured and having the large flat lip beautifully veined with rose-purple

ODONTOGLOSSUM	Alexandræ	(crispum),	Colombia	...	2	6	5

Our strain of this lovely Orchid is well known to be the very best to be had. We employ a collector of great experience, devoting his entire time to keep us supplied; hence we can offer fresh imported plants at any time of the year. The culture of this plant is a great feature in our establishment, and anyone interested should call and see them in flower about April to June. Some of the choicest varieties sent out have flowered from our importation; namely, *Od. crispum Charlesworthii*, *Od. crispum Wrigleyanum*, *Od. crispum apiculatum*, etc.

At the option of the buyer we can supply either fresh imported, semi-established or established plants.

Nice useful plants, semi or established, 200s. per 100.

We quote a passage from a description of our Nursery, given in *The Gardening World*, Nov. 1890, p. 172. "Another similar house claims the unbounded admiration of all who are privileged to enter it, for here is to be seen the *Oneidium* of *Oneidiums*, the magnificent *O. macranthum*, in such numbers, and plants of such size and vigour as we never have seen anywhere else. They are alone worth a journey to Heaton. Some 120 spikes were in process of development, and what a sight it will be when all are in bloom can be better imagined than described. Here also is a strain differing from the type, with short stumpy spikes, which we have not seen before."

In addition to prices quoted above, we can offer small but healthy, well-grown plants at 48s., 60s. and 72s. per doz.

ZYGOCOLAX.

VEITCHII ... Zygo-crinitum × Colax jugosus

We have an immense stock of all the leading species and varieties of Orchids, in small and specimen plants—imported and established, but we recommend to those desirous of having their houses gay with flowers to purchase well-cultivated plants, which are more satisfactory than newly-imported or semi-established.

Almost every week we receive importations from various parts of the world, and shall be glad to send a list to any one who may be desirous of purchasing fresh imported Orchids.

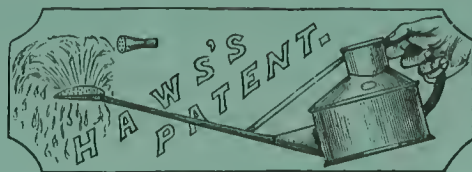

For the convenience of our customers, New Beginners, we propose offering collections of showy, popular and easily cultivated Orchids at a fixed price:—

12 SHOWY ORCHIDS:—3 Cattleyas, 3 Odontoglossums, 3 Oncidiums,										<i>s. d.</i>
1	Cypripedium,	1	Dendrobium,	1	Masdevallia	...	price	60s.,	84s. and	120 0
24 SHOWY ORCHIDS:—4 Cattleyas, 4 Odontoglossums, 4 Oncidiums,										
2	Cypripediums,	2	Dendrobiums,	2	Masdevallias,	2	Lælias,			
1	Phalænopsis,	1	Vanda,	1	Cœlogyne,	1	Epidendrum,			
								price	120s.,	168s. and 240 0
12	Distinct Odontoglossums	price	84	0
12	Distinct Cattleyas	„	100 0
12	Distinct Oncidiums	„	84 0

We are at all times happy to correspond with gentlemen living abroad, and to treat with them for the introduction of Rare and New Orchids; we shall be glad to hear of any persons who may have any new species or variety of Orchid for disposal.

LIST.

								QUARTS.	s.	d.
LADIES' CAN, one rose	one	1	9
" " "	two	2	9
Sprays for Nosesays, 1/- and 1/6										
SHELF CANS, 9-inch spout, 1 pot rose and extra joint	two	2	6
Do. do. do.	three	3	6
No. 1. PROPAGATING CANS, 2 roses and extra joint for spout	three	4	0
No. 2. GREENHOUSE CAN, 2 roses	four	5	0
No. 3. NURSERYMAN'S CAN, 2 roses, iron bound	six	5	6
No. 4. Do. do. Rose Can, 2 roses, iron bound	eight	6	0
No. 5. Do. do. 1 rose, 1 spreader	ten	6	6
No. 6. Do. do. do.	twelve	7	0

All with strong Brass Sockets and Unions.

3 and 4 gallon Improved WATER CARRIERS, 3/9 and 4/9

A detailed illustration of a collection of vintage camping or military equipment. The scene is filled with various items: several large, cylindrical metal canteens or jugs with handles, some marked with numbers like '2', '3', '5', and '6'; smaller metal cups; and various tools including axes, knives, and what appear to be small saws or shovels. The items are arranged in a cluttered, overlapping pile, suggesting a storage or preparation area for outdoor activities. The illustration is in a classic, detailed style with cross-hatching for shading.

The recent demand for these practical and useful Cans renders any comment unnecessary.

The large Cans, No. 3, 4, 5, 6, have a galvanized iron hoop round the bottom, and good, strong, heavy bottoms inserted.

Handles supplied when required, Repairs done, and Ordinary Cans made to order.

CHARLESWORTH & Co.,

ORCHID IMPORTERS.

HEATON, BRADFORD, YORKS.

SUNDRIES.

Charcoal, best lump. 2/6 per bushel.

Best Fibrous Orchid Peat, extra selected. 10/6 per sack.

Thermometer, combined maximum and minimum, in japanned case, with magnet. Price 9/-.

Wood Wool, for packing tender and valuable plants or fruit, pure white, extra fine and free from smell, 20/- per cwt.; second quality, 12/- per cwt.

Orchid Books at advertised prices.

SHADING.

White Cotton, No. 6a. 54 in. wide, 1/- per yd.; 72 in. wide, 1/6 per yd.; 100 in. wide, 2/- yd.

Piffany, No. 1. 38 in. wide, 20 yds. long, 8/- the piece.

Lath Roller Blinds (our own invention and manufacture). They are neat in appearance, and whilst admitting the requisite amount of light, form the most effective shading possible. Further, they afford an excellent protection against frost during severe weather. We have supplied several of the leading Orchid establishments with these Blinds, and the universal verdict is that the Blind is a most useful invention. They are made in lengths from 10 to 20 feet, and can be rolled up singly or together. Price per square yard, 2/-.

We shall be glad to call upon intending purchasers and attend to the fixing of the Blinds.
